

Paseo® Umbrella

# Paseo<sup>®</sup> Umbrella

With its welcoming personality, the Paseo<sup>®</sup> umbrella has been the popular choice for hotels, restaurants, office buildings and private homes for more than two decades.

The original Paseo, made of aluminum with eight standard powder coat color options, is an attractive choice for shade protection. The metal is safeguarded from corrosion with a special Chem Film<sup>®</sup> conversion coating. A powder coat finish is then applied, and the umbrella is ready to withstand the elements. Aluminum hubs and stainless steel arm connectors further fortify the Paseo and set it apart from the majority of umbrellas on the market, which use plastic components. Sleek and refined, the Paseo is available in square and hexagonal shapes.
