# PANTONE 17-3938 Very Peri

## A New Pantone Color Whose Courageous Presence Encourages Personal Inventiveness and Creativity

We are living in transformative times. Even as the world faces new challenges, we welcome spring, a season of transformation, and the opportunity to move away from the past and to focus on the hope and promise of the future. This year's Pantone Color of the Year, Very Peri, places that future in a new light. Displaying a carefree confidence and a daring curiosity that animates our creative spirit, Very Peri helps us to embrace this altered landscape of possibilities, opening us up to a new vision as we rewrite our lives.

According to Laurie Pressman, vice president of the Pantone Color Institute, "Very Peri is a symbol of the global zeitgeist of the moment and the transition we are going through. As we emerge from an intense period of isolation, our notions and standards are changing, and our physical and digital lives have merged in new ways. The Pantone Color of the Year reflects what is taking place in our global culture, expressing what people are looking for, and highlights the expansive possibilities that lay before us."

In the spirit of this expansive view of the future, we offer you our annual Color of the Year top pics to inspire the endless possibilities for transforming your garden and outdoor living spaces this spring!
