5

Slip the old canopy off the frame.

6

Remove the elbow covers by removing the screws that hold them in place.

7

Install the new elbow covers, using the same screws and holes, if possible.

8

Slip the new cover over the frame, and attach it - first, at the ends of the arms with the L-clips, then at the top of the frame with the screws.

**9**

Insert the finial dowel through the hole in the wind vent, and then re-insert the screw to hold the finial in place.

**10**

Attach the wind vent to the main cover by snapping the fabric straps together.

**11**

Open the umbrella, to ensure the canopy has stretched completely.
