Questions? 800.919.9464

5

Remove the damaged hub by removing the three screws that attach it to the pole.

6

Thread the new wire through the holes in the ends of each of the arms and position the ends of the arms in the teeth of the hub.

7

Twist the ends of the wire together and cut off the excess, leaving a 1" tail.

8

Drill three pilot holes in the new hub and attach it to the pole with the three original screws.

9

Re-install the wind vent by inserting the finial dowel into hole in the wind vent.

10

Drill a pilot hole for the finial in the new hub.

11

Fasten the snaps to re-attach the wind vent to the main canopy.

12

Place the umbrella in its base, and open it to ensure it is functioning correctly.
