

Paseo® Stainless Steel Umbrella

PASEO® STAINLESS STEEL UMBRELLA

The crown jewel of the Santa Barbara Designs lineup, the Paseo® Stainless Steel umbrella represents the ultimate expression of outdoor luxury. Crafted entirely from solid marine-grade stainless steel, this isn't simply an umbrella—it's a statement piece that transforms any outdoor space.

Every component, from the substantial frame to the precision-engineered hub, is fabricated from this remarkable material. The result is an umbrella that feels as solid as architecture yet moves with the fluid grace that only expert engineering can achieve.

Available in both polished and brushed finishes, each offers its own distinct personality. The polished finish catches and reflects light like jewelry for your terrace, while the brushed finish provides understated sophistication that complements any setting.

For those who appreciate materials and craftsmanship so exceptional that they speak for themselves, the Paseo Stainless Steel delivers understated excellence.
