

Paseo® XL Umbrella

PASEO® XL UMBRELLA

The Paseo® XL was designed for those who know and love the original Paseo umbrella but need more - more coverage, more presence, more substantial shade for larger spaces.

When clients began asking for Paseo quality in grander proportions, we didn't simply scale up the existing design. The XL required thoughtful re-engineering to handle the increased demands of a larger canopy.

The center pole increases to a substantial 2.5 inches in diameter, while the frame components are strengthened proportionally throughout to ensure the same smooth, reliable performance Paseo is known for.

The signature easy open-close system scales up beautifully, thanks to four marine-grade stainless steel ball bearing pulleys paired with high-performance nylon cord. This ensures effortless operation even at this impressive size.

The Paseo XL delivers all the quality, durability, and sleek aluminum construction of its smaller sibling, but with the commanding presence needed for expansive terraces, large pool decks, and outdoor spaces where standard umbrellas simply aren't enough. It's Paseo performance, just bigger and better.

Paseo® XL Umbrella

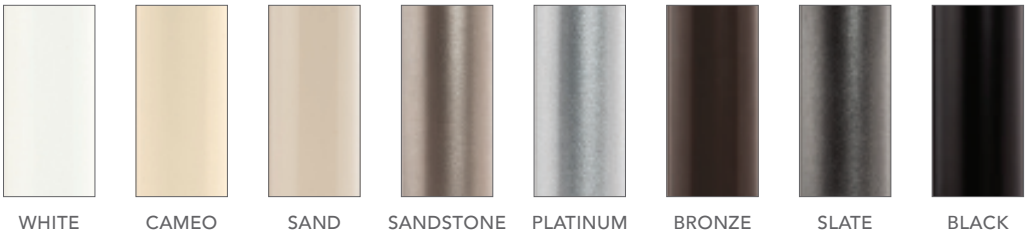

Specifications

OCTAGON	STYLE NUMBER	SIZE	GROUND CLEARANCE	POLE DIAMETER	OVERALL HEIGHT
	PXO - 10	10'0"	7'0"	2.5"	8'11"
