

Riviera® Umbrella

RIVIERA[®] UMBRELLA

The Riviera[®] offers elegant simplicity in a premium teak umbrella. Available in our most popular sizes, it features a clean, streamlined frame with solid stainless steel or brass hubs.

Inspired by the natural beauty of the French Riviera, this umbrella captures relaxed luxury through quality materials and refined design. The Riviera collection was created for those who appreciate clean lines without unnecessary detail - where the beauty lies in the simplicity.

The streamlined design makes it versatile enough to complement any outdoor space, from contemporary to traditional settings. The solid hub construction provides structural integrity while maintaining the smooth operation you expect from Santa Barbara Designs.

Choose a solid color with a clean-edged canopy for classic elegance, or dress it up with stripes, banding, or even a fringed valance for a bolder statement. The Riviera's refined foundation provides the perfect starting point for your personal style.

Riviera® Umbrella
