

The Santa Barbara Umbrella®

# THE SANTA BARBARA UMBRELLA®

Introduced in 1981, The Santa Barbara Umbrella® takes its design inspiration from the exotic umbrellas found in open-air markets of the Mediterranean. Named after the sun-drenched California city of Santa Barbara, this classic umbrella has earned a reputation for superior shade protection and remains our most iconic design.

Having perfected the art and science of umbrella making for more than 40 years, Santa Barbara Designs ensures the original Santa Barbara Umbrella performs like no other. Leveraging its enduring popularity with the introduction of new material choices, including three wood frame options, and new features like lifetime anodized aluminum hubs, marine-grade ball bearing pulleys, solid stainless steel fittings paired with a solid stainless steel open and close system, and metal finial options, this umbrella continues to be an iconic mainstay in the Santa Barbara Designs lineup. Available in sizes from 7.5 feet to 16 feet to accommodate any space, in octagonal, square and rectangular shaped canopies.

The Santa Barbara Umbrella®
